Track: Multidisciplinary and Interdisciplinary Studies

Introduction

This track extends an invitation for both theoretical and applied research papers that delve into topics pertinent to the concepts surrounding Multidisciplinary and Interdisciplinary Studies. Its overarching aim is to establish a dedicated platform for the dissemination and discussion of such research, thereby emphasizing the extensive efforts to enhance the efficiency and effectiveness of this research area. In alignment with this year's conference theme, submissions that explore opportunities to improve decision-making for a diverse set of stakeholders are especially encouraged.

Topics:

Broadly, the main areas of inquiry include the followings Multidisciplinary areas but not limited to:
Children and Youth, Communications and Media, Complex Systems, Conflict resolution, Creativity, Culture, Disaster Management, Discourse, Film studies, GLBT Studies, Gender studies, Globalization, Human Rights, Identity, Leadership, Memory, Poverty, Public Policy, Sexuality and eroticism Spirituality, Sport science, Sustainable development, Tourism, Urban studies, Violence, Women's studies e-Health Technologies, Emerging Technologies, Entrepreneurship, Environmental Technology Management, Financing and commercializing innovation, Global Production Network, Green Technologies, Human Resource Management, Human resource management issues in innovation, Industrial and Manufacturing System Technologies, Industrial and Systems Engineering, Industrial Engineering, Industrial, Mechanical, Systems Science and Engineering, Information and Communication Technology Management, Innovation and management issues within multinational corporations, Innovation and Management of Renewable Resources, Innovation for sustainable development, Innovation in services, logistics and supply-chain management, Innovation Policy and Management Innovation, Management and Technology, Intellectual property and knowledge management, Intellectual Property Right and Patent, IT Management: e-Government, Health Informatics, Knowledge Management, Logistics and Scheduling, Machinery and Machine Design, Manufacturing and Production Processes, Manufacturing Engineering, Manufacturing Systems Engineering, Management of Innovation and Technology, Energy Technologies, Management of Technology Education and Research, Management of Technology for the Knowledge Economy, Management of Technology in Developing Countries, Managing collaborative innovation, Managing IT and Ecommerce, National and Regional Systems of Innovation, New Product / Service Development, New Product Development, Organizational innovation, Process Innovation, Project and Program Management, Project Management, Research and Development Management, Regional innovation systems, clusters and industrial networks, Risk and Security Management, Risk Management, Semantic Web and Ontology Management Technology, Service Science and Innovation, Six Sigma and Quality Management, Small and Medium Enterprises Social impact of technology development, Supply Chain Management, Sustainable Development, Mergers and Acquisitions, Technological innovation, product innovation and industrial innovation, Technology Foresight, Technology Intelligence and Planning, Technology Strategy, Technology Transfer, Marketing and Commercialization.
